This Don Brooke designed is proven world cruiser..

Built by Alloy Yachts International in New Zealand.

Built to the highest standard under Llyods register Qualification 100A1+ L. M. C

Highly functional boat that can be easily and safely used by a family or by and adventurer wanting to sail the world.

Presently based in New Zealand and holds a new Maritime New Zealand Survey to charter up to 49 pqssengers plus crew.

Under charter in New Zealand and Pacific Region

Built by the best Sailng Superyacht builder of their time, Alloy Yachts International, this yacht had no expense spared during the build process to ensure total redundancy and back up of all systems. The large fuel tanks ensure a huge range motoring and with thre highly sort after Gardner engines the boat is very effiecient to run over any distance. If you prefer sailing the propellors can be feathered to ensure no drag and the sails can be wound out of the main mast

and missen hydrulically at a touch of buttons. The headsails also operate like this and all sails are trimmed on large winches on the aft area.

The boat has a shallow keel. This allows it to get into shallow ports, reefs and lagoons as it draws only 7.5ft (2.86m). This works well with the adventurer wanting to explore places most sailing yachts cant go.

It it set up as a sailer or motor yacht so it has ample room for all passengers in the pilothouse, under the rear canopy with its large folding tables or in the main saloon.It has ability to cruise anywhere in the world at 200 nautical miles per day with complete safety in a well-protected strong yacht. She is built under Lloyds specifications and has all the best gear of the time, with most of it over- speced. She is designed for long term adventure cruising for a family who want to go to remote areas for extended times. She has been set up with backups for all systems, has 2 massive anchors and chain setup plus a spare for the aft. She is set up for diving, with everything needed on board. There is a full inventory list found on the `sale page' on Pacific Eagle's webpage. She has massive storage on board, including over 30 cubic feet of customised freezer space and can be self-contained for over 6 months. The fuel capacity is 12,500 litres giving her a huge range at 26 litres per/hour running her 2 engines and one of her two generator's at cruise speed. The range can be increased dramatically by feathering one propeller. She holds 5000 litres of fresh water and makes 4 litres per/minute. She has a massive amount of spares, all set up for extended periods. Most parts are bolt-on complete plus repair kits. She also has a Panama Canal Identification Number.

Well priced for a quick sale! Very attractive with the USD or Euro to NZD!

Features
