Description

Shaped by architect Filippo Salvetti, who worked with Ferretti Group to devise the external design, this newest member of the fleet opens up a whole new way to experience the sea. The 720's remarkably ingenious solutions elevate the concept of cruising in luxurious comfort to new heights. It's about living the sea life in style, in your home on the waves, with all the comforts of a yacht of timeless elegance and a sensation of wellbeing like never before. The Ferretti Yachts 720 debuted at the 2019 Cannes Yachting Festival and caused an immediate stir. With her amazing spaces, unexpected headroom and abundance of areas to enjoy, she takes the cruising experience to a new level. She is the fruit of a partnership between our Product Strategy Committee and the Engineering department - the second yacht with external design by Salvetti and Ferretti Group, with interiors by our own architects and designers. The spacious master cabin echoes the play of colours and materials that grace the main deck, in a peerless private setting that's a joy to discover. The minimalist yet detailed design provides a continual counterpoint to the walk-in wardrobe and the grand bathroom, where the smoked-glass inserts and functionality of form are in tune with current trends. The winning style of this desirable new model is based on a blend of contrasting textures. The striped ceiling, the ribbed surface of the walls, the grid-pattern headboards and the lounge furniture's oblique-stripe motif play off one another in a profound natural harmony. The lighting design is an attribute that is unique to the 720. Horizontal LEDs integrate into the ceilings to create a soft, diffuse effect, while independent vertical spotlights with adjustable beams pick out original features with scenic flair. It all adds up to a sublime experience of genuine cruising comfort.
