Description

40,000 hours of concept development. 4,250 hours of naval design. 9,650 hours of prototyping the moulds. Those are the numbers behind a monumental project powered by talent and technology, innovative spirit and artisanal skill. The Ferretti Yachts 1000 is the largest yacht that the yard has yet built. To assure the finest quality and the most sublime detail, we rethought the whole production process, combining cutting-edge technology with the expert craftsmanship and time-honoured know-how of the Ferretti Group master shipwrights. For experience is the key to the attention to detail that a work of true excellence demands.

It takes time and patience to make a masterpiece, to let an idea take shape and turn it into the embodiment of a dream.

It takes time to make the time that matters most: the moments that you will savour in your new home on the waves.
