Description

With a dynamic and futuristic hull design, the Sunreef Supreme 70 Eco combines superyacht DNA with the latest green technology to offer a sustainable e-motoring experience in total comfort and luxury. The design brief of the Sunreef Supreme 70 Eco aims at maximum green power generation with large flat surfaces entirely covered in the shipyard's patented composite-integrated solar panels, delivering up to 30kWp. The solar power obtained is used both for the appliances on board and the electric propulsion.

A luxurious and seaworthy cruiser, the Sunreef Supreme 70 Eco stands out with impressive amounts of living space on board. Her main deck features a generous full-height panoramic glazing letting plenty of natural light into the saloon. A fully-customizable craft, the Sunreef Supreme 70 Eco boasts an infinite choice of layout solutions, including the option to set up a master suite with ocean view on main deck level.

The luxury e-motoryacht features an immense flybridge and a full-beam aft cockpit offering total freedom for customization.

One of the yacht's standout features is the superyacht aft garage able to accommodate a tender, a personal watercraft, diving gear and a fleet of water toys. With the garage door open, the Sunreef Supreme 70 Eco offers an 11m-wide private beach. Sunreef Supreme 70 Eco is going to be produced in a new shipyard in the United Arab Emirates.
